

14th RAP Seminar

The 14th Seminar on RIKEN Center for Advanced Photonics

Language: Japanese

Date : July 18(Fri), 2014, 16:00 - 17:00

Location : **RIKEN Sendai Campus, 1F Seminar Room**
(理研 仙台キャンパス 1階セミナー室)

Wako: Cooperation Center, 3F, W319, TV relay
(和光 : 研究交流棟3階会議室,W319 (TV会議))

Title : **Optical Science and Technology
From Now On**

これからの光科学・光技術

Speaker : **Prof. Yoshiaki KATO**
(President, The Graduate School for the Creation of New Photonics Industries)

加藤 義章

(光産業創成大学院大学・学長)

The Industrial Revolution in the 21st Century is becoming seriously considered in several countries. For example, networking people, objects and systems is proposed in Germany, and close collaboration between fundamental knowledge, enabling technology and systems is proposed in USA. Strategic approach for this Revolution is also important in Japan. Since very competitive R&D are undertaken in optical science and technology in Japan, this field may be able to contribute to the Revolution. We will review various aspects in considering the development of optical science and technology from now on.
