

19th RAP Seminar

The 19th Seminar on RIKEN Center for Advanced Photonics

Language: Japanese

Date : **Jan.16 (Fri), 2015, 16:00 -17:00**

Location : **Cooperation Center, 3F, W319, Wako Campus, RIKEN**
(理研 和光キャンパス 研究交流棟3階会議室 W319)

Title: **Collaboration with Industry
at RIKEN Innovation Center**

イノベーション推進センターにおける産業連携への取り組み

Speaker : **Akihiro FUJITA, Director**
(RIKEN Innovation Center (RINC))

藤田 明博

(理研イノベーション推進センター・センター長)

One of the principal missions of RIKEN's 3rd five-year term is to "Contribute to society through research collaboration and network-building within and outside of RIKEN for industrial and medical science applications." The RIKEN Research Cluster for Innovation (RCI) plays a central role in promoting activities related to this mission. RCI has three missions: "Promoting interdisciplinary research", "Developing the Baton Zone" and "Creating and using intellectual property". The RIKEN Innovation Center is in charge of the second mission in which RIKEN works together with private corporations to develop technology that meets their needs. In the Baton Zone process, RIKEN's technology and knowhow is gradually transferred to the corporation. Here we have three different programs—"Integrated Collaborative Research with Industry", "Collaboration Centers Program" and "Sponsored Laboratories"—tailored to the duration required for the research and the share of funding provided by the corporate partner.
